

Take a closer look at Aged Bronze.

Distinctive Appearance with a historic feel.

Naturally Aged look with a soft
bronze highlight.

Attractive rich coloring remains
consistent through time.

Wear-resistant finish that lasts.

Introducing a finish that performs as well as it looks.

Aged Bronze (643e) from Ingersoll Rand Security Technologies offers a classic distinctive look that lasts long into the future without wear or weathering. This classic finish provides the consistency and longevity that is required for commercial applications. From locks and deadbolts, to exits, closers and hinges, when you are looking for a complete package of complimentary designs that allows you to maintain a classic look door, to door, to door, Ingersoll Rand Security Technologies has it covered – in Aged Bronze, of course.

A finish for every door.

Compromise no more. Aged Bronze is available in the most popular Ingersoll Rand security products to ensure every door is covered. From entrance to utility room, Aged Bronze keeps your doors looking good with the most popular designs of locks, exit devices, closers and hinges.
