# Interactive training session:

## Code requirements for door openings

Gain continuing education credits for the AIA and ICC while learning about:

- Egress requirements including those that apply to panic hardware, locksets, and deadbolts
- Considerations for code-compliant security in schools and higher education facilities
- Benefits of fire door assemblies and the fire door inspections mandated by current codes
- Impacts of the accessibility requirements on door openings, including automatic doors
- Electrified hardware and the special locking arrangements addressed by the model codes
- Recent and upcoming code changes and clarifications that affect doors and hardware

**Code Update for Swinging Doors: What's new, with a focus on electrified hardware**

In this interactive session, Lori Greene of Allegion will share information on recent updates to the model codes with regard to egress doors, fire door assemblies, and accessibility requirements. A portion of the session will focus on electrified hardware and special locking arrangements. Lunch will be provided, and there will be time for Q&A.

**DATE:**
Tuesday, May 9th, 2023

**TIME:**
10:00 AM - 3:00 PM

**LOCATION:**
Clemson University, Clemson SC

**REGISTRATION LINK:**
iDigHardware.com/Clemson

Participants must register in advance. Additional information will be sent by email.

## About Lori Greene

Lori Greene, DAHC/CDC, FDAI, CCPR is the manager – codes and resources for Allegion and has more than 35 years of experience in the door and hardware industry. She provides support and training on the requirements of the building codes, fire codes, and accessibility standards related to door openings, and participates in code development with the Builders Hardware Manufacturers Association (BHMA), Codes, Government, and Industry Affairs Committee (CGIA). She is also a member of the National Fire Protection Association (NFPA) and the International Code Council (ICC).

iDigHardware.com is a website that was created by Lori in 2009, and since the site's inception she has shared daily updates on the code requirements that affect fire doors, egress, and accessibility. The site currently houses more than 3,000 individual posts, in-depth technical articles, on-demand training, videos, and the downloadable 40-page Allegion Code Reference Guide. Visitors to the site can subscribe to receive daily or weekly notifications of new posts and can access a list of Allegion Code Experts (ACEs) by state to assist with code questions.
